

Eoin McQuone – Go Climate Positive

Thursday 20 May, 12:30pm

#BI21.3 Climate Forum

Gloucestershire and the South West region are home to some of the largest and most influential energy generation and distribution businesses in Europe. Our Climate Forum brings a discussion together with leaders and decision makers in the sector who share a common interest in seeing how this important area for everyone evolves moving forward. We have a diverse and innovative culture of small and medium sized businesses that both generate renewable and sustainable energy, distribute across micro networks and also invest heavily in renewables, carbon capture and energy efficiency. We're looking forward to a very engaging discussion as things start looking beyond the Covid pandemic and preparing for the future for business with Climate change becoming the planet's number one threat.

Eoin McQuone

Eoin believes that building a profitable, future-proof business nowadays requires a change from the traditional model. It's all about creating a business that not only makes a profit now but that is set up to continue to grow and flourish in a world of climate change and increasingly scarce resources.

He launched "Go Climate Positive" in February 2020 to make it easier for businesses to understand and reduce their carbon footprint with the ultimate aim of becoming Climate Positive.
